RE: Bon Air / Fruge Road -- Tower Site

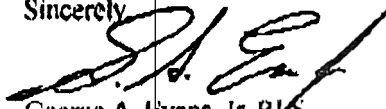

Dear Sir:

This letter is to confirm that on January 21st, we assisted in the setting and alignment of the antenna transition base.

We have determined that the antenna transition base was set with the antenna facing an azimuth of 187 degrees off true North. This was determined from a position established 508 feet South of the tower base. The approximate margin of error in alignment is +/- 0 degrees 2 minutes and 30 seconds.

If you have any questions and/or comments, please contact me at (337) 477-4751

Sincerely,

George A. Evans, Jr. RLS
