This is to certify that the Propagation Systems, Inc antenna model PSIFMR-2E-50WS-DA was assembled and installed according to the manufacturer's specifications for radio station KSWG-FM and was built under the construction permit assigned to Barna Broadcasting.

The installation was under the supervision of Mark Parthe, Chief engineer for Arizona Broadcast Service.

Attached is the certification letter from Kenneth Shipley of 82Bravo Surveying, stating that the antenna was correctly orientated to the specified azimuth of 322 degrees true as required in the FCC construction permit.
