

EXHIBIT 11

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules.

Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but two other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contours of W285DI, Binghamton, NY and WWYL, Chenango Bridge, NY demonstrate that there is no prohibited contour overlap between these two facilities and the instant proposed FM translator facilities. One Class B FM station, five proposed new FM translators and one operating FM translator have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The eight facilities that have been included on the attached maps are: WNBT-FM, 104.5, Wellsboro, PA (54 dBu contour to proposed 34 dBu interference contour); WWYL, 104.1, Chenango Bridge, NY (60 dBu contour to prop. 100 dBu int. contour); W285DI, 104.9, Binghamton, NY (60 dBu contour to prop. 100 dBu int. contour); WFRG-FM, 104.3, Utica, NY (54 dBu contour to prop. 48 dBu int. contour); Proposed Translator, 104.5, Ithaca, NY (60 dBu contour to prop. 40 dBu int. contour); Proposed Translator, 104.5, Carbondale, PA (60 dBu contour to prop. 40 dBu int. contour); Proposed Translator, 104.3, Bostwick Corners, NY (60 dBu contour to prop. 54 dBu int. contour); and Proposed Translator, 104.5, Walton, NY (60 dBu contour to prop. 40 dBu int. contour). WCDW 104.5 Johnson City, NY

74.1204(d) Narrative and its related maps are included to show allowable overlap under Section 74.1204(d) with this proposal's 100 dBu interference contour and the 60 dBu coverage contours of W285DI, Binghamton, NY and WWYL, Chenango Bridge, NY. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
