

**(Clarification Note)**

At the time of installation the only tower space available was lower on the tower than was applied for. Since the site is on a mountain the added height wasn't quite so critical.

Transmitter Antenna Height Applied for: 55 meters (as built: 37 m)

Receive Antenna Height Applied for: 4 meters (as built: 23 m)

Coax Length on Application: 70 meters (as built: 43 m)

Transmitter Power Output Applied for: .035kw (as built: .027kw)

Form 350

WBSJ-FM

Transmit antenna mounted at 120 feet

Receive antenna mounted at 75 feet

Coax length 140 feet

TPO: 27.19 w.
