MULTIPLE OWNERSHIP SERVICE CONTOUR ANALYSIS

**Prepared for
NM Licensing, LLC
October 2005**

The attached analysis of compliance with the radio multiple ownership rules was prepared in accordance with the Rules and Regulations of the Federal Communications Commission, in connection with a minor change application for station KLAK(FM) (Facility ID #36265).

Unrated Market

The only attributable stations with which the proposed KLAK facility has principal community contour overlap are:

KMAD-FM	273C2	Whitesboro, TX
KMKT(FM)	226C3	Bells, TX
KSOC(FM)	233C	Gainesville, TX
KXEB(AM)	910 kHz	Frisco, TX
KJON(AM)	850 kHz	Carrollton, TX

KLAK operates outside any market rated by Arbitron. Therefore, analysis has been made consistent with the Commission's interim rules for unrated markets. The 70 dBu contours of FM stations were determined from the technical data contained in the most recent edition of the FCC FM Database. The listed antenna height above average terrain was used together with topographic data obtained from the digitized 30 second or 3 second database. The 5 mV/m daytime contours of AM stations were determined from the technical data contained in the most recent edition of the FCC AM Database. The listed antenna parameter information was used together with a digitized version of the FCC M-3 or Region II ground conductivity database.

The service contours were plotted using correct map projection mathematics. Those stations whose transmitter sites are within the respective principal community service contours of the stations proposed to be commonly owned have only the sites rather than their contours shown. All contours and enclosed transmitter site locations have been labeled. A list of all stations considered is included with this statement.

In counting stations providing service to the "market" defined by each of the discrete clusters formed in unrated markets, stations whose transmitter sites are located in excess of 92 km from the perimeter of the common overlap area have been excluded, as have other stations to be commonly-owned but which are not a part of the discrete cluster being studied.

This exhibit evidences at least the minimum number of stations necessary to demonstrate compliance with the rules concerning radio multiple ownership in unrated markets for each of the two discrete clusters formed by KLAK and other attributable stations.

Cluster A: KLAK(FM), KMAD-FM, KMKT(FM), KSOC(FM), KJON(AM)

In order to qualify for common ownership of this 4FM/1AM cluster, there must be at least 15 stations in the relevant "market". This study demonstrates that there are at least 32 stations in the relevant market.

Cluster B: KLAK(FM), KSOC(FM), KJON(AM), KXEB(AM)

In order to qualify for common ownership of this 2FM/2AM cluster, there must be at least 8 stations in the relevant "market". This study demonstrates that there are at least 31 stations in the relevant market.

October 11, 2005

A handwritten signature in black ink, appearing to read "Erik C. Swanson". The signature is fluid and cursive, with the first name "Erik" and last name "Swanson" clearly distinguishable.

Erik C. Swanson
