RE: FCC Broadcast Permit File Number BMPED-20121024ACV

To Whom It May Concern:

On July 26, 2013, Mark Logrbrinck provided directional control at the site of the transmitting antenna for KRZU, 90.7 FM located near Batesville, Zavala County, Texas.

Azimuth marks were set at 60°, 230° and 325° on the ground approximately 440 feet, 640 feet and 370 feet respectively from the centerline of the point of rotation on which the antenna is clamped and aimed, per the antenna manufacturer's drawings.

An antenna technician manually aimed the antenna to the azimuth mark. The survey crew checked the sighting and aiming of the antenna via an optical survey instrument set at the azimuth mark, sighting the antenna's rotation point through the centerline of the antenna to confirm that it was oriented at the proper azimuth with accuracy better than +/- 0.5 degrees.

I, Mark Logrbrinck, hereby certify that I am a Registered Professional Land Surveyor licensed in the state of Texas, and have held this qualification since June 2013.

Mark Logrbrinck RPLS 6418
