

**Exhibit 38**

Applicant requests an extension of special temporary authority (“STA”) to continue to operate WSIL-DT at reduced power. The Commission last granted Applicant’s extension of STA on August 28, 2007, for a period ending February 28, 2008 (FCC File No. BEDSTA-20050701ADV). The Applicant’s original STA is FCC File No. BDSTA-20020905ABU. This extension request proposes continued operation consistent with the station’s current STA.

In its DTV Transition Status Report filed on February 19, 2008 (FCC File No. BDTRCT-20080219ASL), WSIL-DT set forth its plan to complete its digital transition. As noted therein, WSIL-DT’s STA facility complies with its DTV transition obligations, and WSIL will soon be filing an application to modify its construction permit to specify the STA facility parameters as its post-transition DTV facility. Upon grant of that application, WSIL will file a license to cover, thereby extinguishing the need for extension of the STA.

Because grant of the instant request for extension of STA would allow Applicant to continue to provide digital television service in conformity with the Commission’s DTV policies for the brief period until WSIL-DT files and secures grant of a modified DTV construction permit, grant of the instant request would be in the public interest.
