Re: New(FX), Draper, UT  
Facility ID No. 202892  
Kona Coast Radio, LLC  
BNPFT-20180418AAE

Dear Applicant:

The staff has under consideration the above-captioned application for a new FM translator.

An engineering study has revealed that the proposed facility specified in the application fails to meet the interference protection requirements of 47 C.F.R. § 74.1204. Specifically, the 100 dBu interfering contour of the proposed facility would overlap the 60 dBu contours of the second-adjacent channel facility for KODJ(FM), Salt Lake City, UT (BLH-20061005ADE) and the second-adjacent channel facility for KENZ(FM), Provo, UT (BLH-19801219AI). The application recognizes this issue and requests processing pursuant to Section 74.1204(d) towards KODJ(FM) and KENZ(FM). However, the application does not adequately demonstrate that no interference will occur. The application states that "...the 100 dBu contour will not cover any population." However, our review of the 100 dBu contour shows numerous structures within the potential interference area. Therefore, the application is unacceptable for filing and will be dismissed. Please note that an adequate demonstration of no interference should contain items such as a tower diagram, the antenna manufacture's vertical radiation pattern, and/or any details about any nearby structures or major roadways.

Accordingly, in light of the above, application BNPFT-20180418AAE is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283

Sincerely,

James D. Bradshaw  
Senior Deputy Chief  
Audio Division
