**CUMULUS LICENSING LLC**  
**W247AD FM TRANSLATOR**  
**CH 247D - 97.3 MHZ - 0.01 KW**  
**VINTON, VIRGINIA**  
**July 2005**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of FM translator station W247AD, Channel 247D, Vinton, Virginia. Cumulus also holds an outstanding permit to relocate the facility (BPFT-20050519AFG). This instant application seeks a license to cover the outstanding permit. Attached, as Exhibit A, is a calculation of the transmitter power output power for the W247AD translator.

There are two special operating conditions/restrictions listed on the W247AD permit. The first condition is that an application for station license must be on file before commencing program test with the facilities authorized in the permit. This instant application for license will be on file before program test are commenced. Attached as Exhibit B is a certification by a licensed surveyor that the W247AD antenna has been properly installed.

The second condition requires Cumulus to reduce the power of W247AD, or cease operation, to insure persons with access to the site are not exposed to radio frequency radiation levels above the limits. Cumulus herein restates that it will, in cooperation with other tower

users, reduce the power of W247AD or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines.

Based on the foregoing, it is believed that all conditions on the W247AD permit have been satisfied.
