

**Exhibit 11**  
**Radio Assist Ministry, Inc.**  
**Adjacent Channel Interference**  
**Rincon, Georgia**

The Proposed translator on FM Channel 269D with facilities of 13 watts ERP at a maximum 118 meters AAT is within the 60 dBu protected contour of station WZAT (Savannah, GA.) on 2<sup>nd</sup> upper adjacent channel 271. The F(50,50) contour with respect to WZAT at the proposed translator site is 86 dBu. Utilizing the undesired to desired method of calculating interference, the proposed interfering contour with respect to WZAT is 126 dBu. The interfering contour (calculated by the free space equation in the worst case radial) will extend a maximum of 13 meters from the proposed antenna.

In addition, the proposed translator is within the protected contour of WLVH (Hardeville, SC.) on the 3rd lower adjacent channel 266. The F(50,50) contour with respect to WLVH is 76 dBu at the proposed site. The maximum interfering contour of 116 dBu will extend to a maximum of 40 meters from the proposed antenna.

The antenna of the proposed translator is 101 meters above ground. The interfering contour extending to a maximum of 40 meters is above ground.

Inasmuch as no population inhabits this area, Radio Assist Ministry respectfully requests a waiver of contour overlap regulations with respect to the proposed translator.
