Providence, RI 02905

Mr. Lariviere,

It was a pleasure meeting with you in the field on Thursday, November 5, to discuss the required antenna measurements for the FCC. Marc N. Nyberg Associates, Inc. performed surveying measurements to establish the orientation of a recent antenna installation for radio station B101 (WWBB-FM). This antenna was located on the roof of One Financial Plaza, Providence, Rhode Island.

The center of the antenna and the Azimuth angle of 211 degrees were fixed utilizing a Trimble GPS unit as well as a Leica Total Station. The antenna orientation of Azimuth 211 degrees was fixed by points on the roof as well as a point on the roof of building approximately 500 feet away. The antenna orientation is at Azimuth 211 degrees plus or minus one degree true.

If you have any questions please feel free to contact me.

Sincerely,

Marc N. Nyberg
President
