

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS

This statement was prepared on behalf of a licensee subsidiary of AMFM Broadcasting Licenses, LLC (“AMFM”). We propose to change the antenna location of KKSF San Francisco, California. A multiple ownership analysis was prepared considering radio stations under present or proposed common ownership, time brokerage or joint sales.ⁱ

Arbitron Market Study

In this application, AMFM is proposing to change the antenna location of Station KKSF. The community of license, San Francisco, California, is in San Francisco County, which is part of the San Francisco, CA Arbitron Metro and thus KKSF-FM is geographically located in this Arbitron Metro. KKSF-FM is designated “home” to the San Francisco, CA Arbitron Metro; the number of stations owned by CCC in the San Francisco, CA Arbitron Metro is not changing by this application.

According to the FCC’s local ownership “tiers,” in a Metro reported by BIA as having 45 or more commercial and noncommercial educational full-power radio stations, a party may have a cognizable interest in up to 8 commercial full-power radio stations, not more than 5 of which are in the same service(AM or FM)ⁱⁱ. This application complies with the multiple ownership rules because only 7 of 111 full-power radio stations (5 FM and 2 AM) will be attributable to CCC.

Interim Contour-Overlap Analysis

Because the principal community of KKSF-FM and the communities of all commonly-owned or attributable stations with overlapping principal contours with KKSF-FM are located inside an Arbitron Metro, an interim contour-overlap analysis is not required.

Respectfully Submitted,

Troy G. Langham
FCC Engineering Supervisor
December 29, 2011
