In re: KRBB(FM), Wichita, KS  
Facility ID #39902  
Capstar TX Limited Partnership  
BPH-20040615ACF

Dear Applicant:

This letter refers to the above-captioned minor change application to modify antenna height and class.

An engineering study has revealed a discrepancy with the site elevation above mean sea level proposed in the application compared to that on the tower registration record. The application indicates a site elevation above mean sea level of 418 meters. However, the tower registration record (#1026741) specifies a site elevation above mean sea level of 417 meters. This discrepancy must be eliminated. Therefore, if the site elevation above mean sea level is 418 meters, the applicant must amend the tower registration record. If the site elevation above mean sea level is 417 meters, the applicant must amend all pertinent parts of the application to indicate the correct site elevation.

Further action on the subject application will be withheld for a period of thirty days from the date of this letter to provide KRBB an opportunity to respond. Failure to respond within this time period will result in the dismissal of the application pursuant to 47 C.F.R. § 73.3568(a). Please note that any amendment must be submitted in the same manner as the original application.

Sincerely,

Rodolfo F. Bonacci  
Assistant Chief  
Audio Division  
Media Bureau
