RE: Directional FM Antenna Alignment – WBTP-FM – Tampa, Florida

Dear Mr. McMartin,

This letter is to certify that the 5-bay directional antenna installed for WBTP-FM on the Richland Tower Site, at 1708 South 50th Street, Tampa, Florida 33619 was adjusted to be oriented to 251° Azimuth from True North on the morning of April 9th, 2013. I was on site to assist the tower personnel in aligning the antenna. It is my professional opinion that the antenna is aligned to 251° Azimuth from True North per your request.

Sincerely,

Landmark Engineering & Surveying Corporation (LB 3913)

Daniel Joseph Sullivan, PSM LS5640
Project Surveyor – Professional Surveyor and Mapper
State of Florida
