*An application for renewal of license for WFLY was filed with the Federal Communications Commission on January 30, 2006 in File No. BRH-20060130AQX and was accepted for filing on February 3, 2006 and remains pending. The FCC staff has informed FCC counsel to the licensee that no action has been taken on the application because of the need first to make a determination with respect to four informal complaints concerning alleged statements made over the station during the license term. As characterized by the FCC staff, those complaints concerned a broadcast with "sexual organ references", a broadcast with "sexual references", a broadcast with "racist remarks", and a broadcast with "violence". The FCC does not regulate alleged "racist remarks" or "violence". It has for some time been deferring almost all indecency complaints while awaiting guidance from the courts on application of the indecency policy.
