

MGTF Media Company, LLC
KMXV (FM) - Kansas City, Missouri

This consultant has been retained by MGTF Media, Company, LLC (MGTF), licensee of KMXV (FM) in Kansas City, MO, for the purpose of providing technical support to its request for Special Temporary Authority to operate KMXV with parameters at variance with the licensed main transmission facilities.

KMXV suffered catastrophic failure of the transmission line that feeds its main antenna (BLH-19870318KG) and as a result it is presently operating on its licensed auxiliary antenna (BLH-19900111KB) with an ERP of up to 100 kW at the same tower location. The auxiliary antenna is a Continental (ERI) model G5CPS and it is centered at 119 m AGL and has a HAAT of 118 m. This request seeks authority to continue to operate on the auxiliary antenna for up to 30 days and with an ERP of up to 100 kW.

So as to protect the repair crew from overexposure to excessive levels of non-ionizing RF Radiation MGTF certifies that it will, in association with other licensees on the tower, reduce power or cease operation altogether as necessary to protect the workers from occupational overexposure as set forth in OST Bulletin Number 65.

All information contained in this report is true and accurate to the best of my belief. Having had numerous matters before the Commission, my qualifications are a matter of record.
