

Exhibit E-7

The proposed facility is excluded for environmental processing under 47 CFR Section 1.1306. A study of the non-ionizing radiation from the proposed structure has been completed. It has been determined that the radiation on the ground will not exceed those values permitted in IEEE/ANSI C95.1-1991.

The licensee agrees to reduce power or cease operation as necessary to avoid exposure of workers on or near the tower to hazardous levels of non-ionizing radiation.
