

EXHIBIT A

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of THREE ANGELS BROADCASTING NETWORK, INC., licensee of Class-A low power station K03HK, Channel 3 in Fresno, California, in support of this amendment to pending application BPTVL-20040329AFS. In it, we are specifying a reduction in ERP. No other changes in the operating parameters are specified herein.

Exhibit B is a revised map upon which the predicted service contours are plotted. It is important to note that the newly proposed 74 dBu contour encompasses a significant portion of that which obtains from the licensed K03HK facility. A revised contour overlap analysis and an interference study are provided in Exhibit C, and a revised power density calculation follows as Exhibit D. A table of operating parameters has not been included within this engineering.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

JEFFREY S. FISHER
