**TECHNICAL STATEMENT**

1. This technical statement and attached exhibits were prepared on behalf of Brookhaven Broadcasting, Inc. (“BBI”), the proposed assignee of stations WBKN, Channel 221A, Brookhaven, Mississippi<sup>1</sup> and WMJU, Channel 282C3, Bude, Mississippi. Principals of BBI also have interests in stations WAZA, Channel 229C3, Liberty, Mississippi and WAKK, 980 kHz, and WAKH, Channel 289C1, McComb, Mississippi.<sup>2</sup> WBKN, WMJU, WAZA, WAKK and WAKH are all licensed to communities located outside of any Arbitron Market and they are not “home” to any Arbitron Market. As such, a revised contour overlap ownership analysis is necessary. Exhibit #1 is a map depicting the city grade contours of the subject stations.

2. A study has, therefore, been conducted to verify that the ownership of these stations is in compliance with the Commission’s multiple ownership rules. As a result of the overlap of contours, two distinct markets are created. Market #1 consists of FM stations WMJU, WAZA and WAKH and AM station WAKK. Market #2 consists of FM stations WBKN (license and

---

1) In addition to the licensed facility, there is an outstanding permit to relocate WBKH (BPH-20040209AAH), which is also considered in this instant review.

2) Principals also own other facilities in the immediate area; WAPF, 1140 kHz, McComb, Mississippi; WAKK-FM, Channel 285A, Centreville, Mississippi; and WFCG, Channel 297A, Tylertown, Mississippi. There is also an outstanding permit for WFCG {BPH-20051014ACZ}, but its city grade contour falls in the same location at the licensed contour. Neither WBKN nor WMJU have overlap with these stations. As such, WAPF, WAKK-FM and WFCG are not further considered for this instant analysis. Other stations owned by principals are even farther from this subject radio market.

CP), WMJU, WAKH and AM station WAKK. Since the city grade contour of WAKH is in both of the markets, its contour will be used to determine the number of other contributing stations in the market, to which will be added the relevant subject stations. Therefore, the WAKH contour will be considered the Radio Market Boundary. No stations with transmitters located more than 92.0 kilometers from the boundary of the common overlap of subject stations will be considered. Nor will any BBI station be considered as a contributing station, unless it is a subject station in the market under review.

3. Exhibit #2 is a depiction of the AM and FM stations (commercial and non-commercial) providing service to the WAKH Radio Market. A total of six other stations have transmitters sites inside the WAKH contour. Exhibit #3 is a tabulation of the stations in Radio Market #1, a total of ten including the four subject stations. The number of stations depicted falls in the fourteen or fewer stations tier of §73.3555(a)(1)(iv) of the Commission's rules.<sup>3</sup> At this level, common ownership or control of up to five stations, with no more than three in the same service, is permissible provided the number of stations to be commonly held does not exceed 50% of the stations in the market. Based on this number of facilities, it has been herein demonstrated that Radio Market #1 is in compliance. \*

4. Exhibit #4 is a tabulation of the stations in Radio Market #2, a total of ten including the four subject stations. The number of stations depicted falls in the fourteen or fewer stations

---

3) There are other stations providing service to the market, however, the ones indicated were sufficient to demonstrate compliance based on the number of stations to be commonly held.

tier of §73.3555(a)(1)(iv) of the Commission's rules.<sup>4</sup> At this level, common ownership or control of up to five stations, with no more than three in the same service, is permissible provided the number of stations to be commonly held does not exceed 50% of the stations in the market. Based on this number of facilities, it has been herein demonstrated that Radio Market #2 is in compliance. Based on the above, it has been shown that the assignment of WBKN and WMJU to BBI is in compliance with the Commission's rules.

5. The foregoing technical statement was prepared on behalf of Brookhaven Broadcasting, Inc., by Graham Brock, Inc., its Technical Consultants. All information contained herein is true and accurate to the best of our belief and knowledge. All data relating to AM and FM facilities was extracted from the CDBS database. We assume no liability for errors or omissions in that database which may be adverse to the information contained herein.

---

4) There are other stations providing service to the market, however, the ones indicated were sufficient to demonstrate compliance based on the number of stations to be commonly held.
