**Exhibit 13 Page 3**  
**Advance Ministries, Inc. d/b/a New Life Christian School**  
**Interference Area**  
**New Auberry, CA**

The Proposed translator is within the 54 dBμ contour of upper third adjacent station KWEY channel 266. The KWEY interfering contour at the translator site is 71.9 dBμ F(50,50). Using the ratio of 100:1 (translator to KWEY) on the third adjacent channel, the population within the proposed translator 111.9 dBμ contour is zero. Using the antenna manufacturer's vertical radiation pattern the area of interference can be more accurately calculated geometrically than just by using the free space equation alone. This particular antenna is a Scala CL-FM antenna. It was determined from the manufacturer's vertical plan that at 35 degrees below horizontal the interference area would clear the ground by 26.6 meters. The antenna radiation center is 45 meters above ground, thus the interference area will never reach the ground. There are no occupied structures or elevated roadways within the interference area of the translator.

Therefore, the application is in compliance with the following: §74.1204 (d) "The provisions of this section concerning prohibited overlap will not apply where the area of such overlap lies entirely over water. In addition, an application otherwise precluded by this section will be accepted if it can be demonstrated that no actual interference will occur due to intervening terrain, lack of population or such other factors as may be applicable."
