

§74.1233(D)(2) Non-Adjacent Channel Displacement Waiver Request & Minor Change Channel Preclusion Showing

Based on an equivalent 9 watt directional operation (at 551 meters AMSL) from the existing site, contour overlap of the Reference Study Coordinates (Existing Site) on all 1st, 2nd, 3rd and I.F. (± 53 or ± 54) Channels prohibits a rule compliant minor frequency change for this Translator operation.

As a result, it is believed a §74.1233(d)(2) Non-Adjacent Channel Displacement Waiver Request is merited in this instance.
