

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CAPSTAR TX LLC

This statement and the attached figures were prepared on behalf of Capstar TX LLC ("CTL"), a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). CTL proposes to modify the facilities of KMXF(FM), Lowell, AR. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales:¹

Table 1: Proposed Commonly Owned, Brokered or Jointly-Sold Stations
Studied and Associated Arbitron Metro² Information

Calls	Fac ID	Band	Community	County	Geographic Arbitron Market	Declared Arbitron Market
KEZA	12702	FM	Fayetteville	Washington	Fayetteville, AR	Fayetteville, AR
KIGL	35014	FM	Seligman	Barry	Non-Metro	Fayetteville, AR
KKIX	48951	FM	Fayetteville	Washington	Fayetteville, AR	Fayetteville, AR
KMXF	48955	FM	Lowell	Benton	Fayetteville, AR	Fayetteville, AR

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), or are located in, or home to, the same Arbitron Metro market, an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.³

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of KMXF(FM), as proposed, which is not located in an Arbitron market, or regardless of contour overlap, which is located in the same Arbitron Metro⁴ as KMXF(FM). The community of license of KMXF(FM) is not located within any Arbitron Metro. KMXF(FM) is reported by BIA as being "Home" to the Fayetteville, AR Metro. Contour overlap of the station to be modified, as depicted in *Figure 1*, also occurs with commonly-owned stations whose communities of license are located in the Fayetteville, AR Arbitron Metro market, and commonly owned stations whose communities of license are located outside any Arbitron Metro market.

¹ None of the following stations are attributable by virtue of a time brokerage agreement or joint sales agreement.

² Arbitron data presented herein is obtained from BIA's "Media Access Pro."

³ See 47 C.F.R. § 73.3555(a).

⁴ A station is considered to be "located in an Arbitron Metro" if the station's community of license is located within the boundaries of that Metro, or, the station is listed as "Home" to that Metro by BIA.

Arbitron Market Study

KMXF(FM) is reported by BIA as being "Home" to the Fayetteville, AR Metro. This proposal is in compliance with the local radio ownership rules for that Arbitron Metro, as evidenced by *Table 2* below:

Interim Contour-Overlap Analysis

Because an overlapping commonly owed station's community of license is located outside any Arbitron Metro, an interim contour-overlap analysis is also set forth in this statement.

⁵ Source: BIA.

Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution. Here, such mutually overlapping contours form on (1) "radio markets" for interim contour-overlap analysis under the Commission's rules as shown above in *Table 1*.

Count of Stations in Defined Markets

The number of radio stations in a contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributable stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market. For simplicity of analysis only stations which overlap KMXF as proposed have been considered, as depicted in *Figure 2*.

In the interim contour-overlap "radio market" studied herein, there are the required number of radio stations, including the subject co-owned stations, which overlap or intersect with the defined "radio market." *Figure 1* through *Figure 3* detail the radio stations identified in the contour-overlap "radio market".

Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Conclusions

In the Arbitron Metro market studied herein, there are at least 28 radio stations, including the subject commonly-owned 4-FM stations, which are home to the Fayetteville, AR Metro. This proposal does not affect the existing number of commonly-owned stations in the subject Arbitron Metro.

In the interim contour-overlap "radio markets" studied herein, there is at least the minimum required count, including the commonly-owned stations.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.

Respectfully submitted,

Troy G. Langham
FCC Engineering Supervisor
June 12, 2013
