

**Minor Change Application**

The proposed minor change of K268AH will have 60 dBu contour overlap in excess of 50% with co-owned FM translator K270AI, Cathedral City, CA, due to the proposed relocation of K268AH to the K270AI site. Both facilities will be fill-in translators for KLXB (FM), however, both will operate with separate feeds, K268AH via KLXB-HD3 and K270AI via KLXB-HD2.
