ENGINEERING REPORT

KSBS-LD, Denver, CA Digital Companion Channel Displacement Modification

EXHIBIT 11

LPTV/CLASS A DIGITAL DISPLACEMENT PROPOSAL

Digital Calls & City, St:	KSBS-LD, Denver, CO
Applicant:	Denver Digital Television, LLC (“Applicant”)
Associated LPTV or Class A:	KSBS-LP (Class A)
Digital Channel:	<u>28</u> (as a digital companion channel)

1. By this application, Applicant proposes to displace KSBS-LD (the authorized digital companion-channel facility of KSBS-LP) to channel 28 (from channel 13) in order to vacate channel 13 for KBDI-TV. (KBDI-TV has been approved for use of channel 13 for its post-transition digital operation.)

2. Attached as Figure 1 are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC’s OET-69 processing program.) Except for those stations also licensed, authorized or proposed by the applicant, or those stations that have consented to predicted interference from this proposal, the proposed facility adequately protects all US broadcast stations as required by the FCC Rules. All studies are conducted in accordance with current FCC Rules and Regulations.

3. The Applicant accepts any existing and future interference that may result from any primary or secondary TV station that is otherwise deemed to have status priority to the herein-proposed facility.
