

The map displays the distribution of K237DP and K237DM haplotypes across the Pacific Northwest. The x-axis represents longitude (from 120°W to 115°W) and the y-axis represents latitude (from 46°N to 47°N). Contour lines indicate the 60 dBμ F(50,50) threshold for each haplotype. K237DP is centered around Kennewick, and K237DM is centered around Walla Walla. The KFFR-CP and KFFR-LIC haplotypes are also shown in the Puget Sound area.
