**REQUEST FOR SPECIAL TEMPORARY AUTHORITY**  
**RADIO STATION KOKC, OKLAHOMA CITY, OKLAHOMA**  
**FILE NUMBER: BL-19870217AAM**  
**FACILITY ID: 73981**

This Firm represents Tyler Media, L.L.C., licensee of Radio Station KOKC, 1520 kHz, Oklahoma City, Oklahoma. Tyler Media recently acquired Station KOKC. Shortly before the acquisition, an accident occurred while the center tower of the three element directive array was being painted by a tower crew. A large bucket of white paint fell from the tower and penetrated the roof of the antenna coupler building associated with the tower. The RF feed line was damaged and the roof was partially destroyed as a result of the accident. Significant damage was caused to the antenna coupling networks and the roof.

Special Temporary Authority is requested for a period of ninety days to operate the nighttime directive array with parameters at variance with the licensed parameters and/or at reduced power as necessary to keep the monitor points at or below the limits specified in the station license.

It is anticipated the damage will be repaired and some updates will be made to the KOKC antenna system to permit relicensing of the station under Section 73.151(c) of the Rules (Method of Moments). An application for station license under Section 73.151(c) of the Rules will be filed as soon as the work can be completed.

Respectfully submitted,

  
J. S. Sellmeyer P. E.
