

**Exhibit 1. Request to Modify to Non Adjacent Channel
KSMZ-LP, Missoula, MT FAC# 192653
July 17, 2017**

This application proposes a change to non- adjacent transmit channel 270. 47 C.F.R Section 73.870(a)(1) allows changes in frequency to adjacent frequencies or I.F. frequencies or upon a technical showing of reduced interference, to any frequency.

On 1/17/2017 KSMZ-LP was displaced when KZJZ, St. Regis, MT (FIN: 164303) was granted 1st adjacent authorization BPH-20160711AAA on channel 257C2.

Applicant is requesting a channel change to 270. No adjacent channel is available for a minor mod for the following reasons:

Channel 255 is not available due to prohibitive 1st adjacent overlap with KHKM.
Channel 256 is not available due to prohibitive 1st adjacent overlap with KZJZ.
Channel 257 is not available due to prohibitive co-channel overlap with KZJZ.
Channel 258 is not available due to prohibitive 1st adjacent overlap with KZJZ.
Channel 259 is not available due to prohibitive co-channel overlap with KQRK.
Channel 260 is not available due to prohibitive 1st adjacent overlap with KZOQ-FM.
Channel 261 is not available due to prohibitive co-channel overlap with KZOQ-FM.
IF channel 201 is not available due to prohibitive 1st adjacent overlap with KJCG.
IF channel 202 is not available due to prohibitive co-channel overlap with KJCG.

Channel 270 meets all the spacing requirements except for 2nd adjacent KAMM-FM (BLH-20071105AER) and is not expected to experience any interference from nearby stations.

Please refer to the request for 2nd adjacent waiver Section 73.807(e)(1) in Exhibit 11.
