STATEMENT OF QUALIFICATIONS

I have been providing technical services to the broadcast industry for over 30 years. During this time I have rebuilt, modified, constructed or have personally supervised the construction of several AM and FM transmitter sites and antenna systems including directional AM and FM translator sites.

I am familiar with section 73.316 of the FCC rules regarding FM antenna systems and have assembled, installed and overseen the position certification of FM directional antennas.

I further certify to comply with the construction permit conditions as set forth in Permit File Number BPED-20090327AHJ, dated April 22, 2009 as amended. The antenna installation was accomplished by Vertical Technology on August 25, 2009 pursuant to the manufacturer's instructions.

Antenna Model: PSIFMR-4C-DA

Type: 4-bay medium power directional FM broadcast antenna

Bay Spacing: Full wavelength

Frequency: 88.1 MHz

Polarization: Elliptical

The above statements are true and correct as contained herein.
