

### EXHIBIT 36

Pursuant to Section 73.1635(a)(4) of the rules of the Federal Communications Commission (“FCC” or “Commission”), Parker Broadcasting, Inc. (“Parker”), licensee of KFQX(TV) and permittee of KFQX-DT, Grand Junction, Colorado (the “Station”), by its attorneys, hereby requests a 180-day extension of the above-referenced special temporary authorization (“STA”) in order to continue operating the Station with reduced power digital television (“DTV”) facilities that comply with the minimum build-out requirements adopted by the Commission.<sup>1</sup> As specified in its initial STA request, these temporary facilities are fully subsumed by the Station’s permitted facilities.<sup>2</sup>

On October 9, 2003, Parker was granted an STA (File No. BDSTA- 20030925BBW) to operate the Station with facilities less than those authorized in the Station’s DTV construction permit. Such STA was subsequently extended through June 29, 2006 (File No. BEDSTA-20050413ADF). Pursuant to the STA, the Station operates with reduced power facilities while providing the requisite coverage to the Station’s city of license. The operating parameters of the Station’s reduced DTV facilities are set forth in the Station’s initial STA request. The instant request proposes to continue operating the Station with such reduced power DTV facilities for an additional period of 180 days.<sup>3</sup>

Grant of the instant request is in the public interest because it enables the Station to operate reduced power facilities until such time as it is able to complete construction of the DTV facilities specified in its DTV construction permit.<sup>4</sup> The Station has worked diligently to complete construction of these facilities. However, due to a manufacturer error, the Station received a smaller power divider than required for its digital operations. The manufacturer has agreed to ship to the Station a new power divider but this power divider is not expected to arrive at the Station until mid- to late-July. Promptly upon receipt of the new power divider, the Station will complete construction of its DTV facilities and file a license application for these facilities. Accordingly, Parker requests an extension of the STA to continue operating the Station with reduced power facilities for an additional period of 180 days.

<sup>1</sup> See FCC File No. BDSTA-20030925BBW, as extended most recently by BEDSTA-20050413ADF.

<sup>2</sup> See Review of the Commission’s Rules and Policies Affecting the Conversion to Digital Television, *Memorandum Opinion and Order on Reconsideration*, MM Docket No. 00-39, FCC 01-330 (rel. Nov. 15, 2001) (“*Biennial Review Reconsideration Order*”) at ¶ 34 (“Licensees with an existing construction permit for a larger facility may elect to commence digital operation with a DTV facility that complies [with the] minimum buildout requirements and is fully subsumed by the permitted facilities.”).

<sup>3</sup> Parker intends to file with the Commission a request for a waiver and six month extension of the July 1, 2006 deadline by which a station outside of the top-100 markets must replicate or lose interference protection.
