Re: K282AE, Barstow, CA  
Facility ID No. 8332  
Casa Media Partners, LLC  
BPFT-20160728AHP

Dear Applicant:

The staff has under consideration the above-captioned modification application for K282AE.

An engineering study has revealed that the proposed transmitter site specified in the application fails to meet the interference protection requirements of 47 C.F.R. § 74.1204. Specifically, the 94 dBu interfering contour of the proposed facility would overlap the 54 dBu contour of the second adjacent facility for KLVE(FM) (BMLH-19950612KB), Los Angeles, CA. The application recognizes this issue and requests processing pursuant to Section 74.1204(d) towards KLVE(FM). However, the application does not adequately demonstrate that no interference will occur. The application implies that it would comply with the rules because of the distance to KLVE(FM), and because of the "...Terrain shielding provided by the San Gabriel Mountain Range." However, the application provides no information beyond that unsupported statement to demonstrate that no interference would be caused by the proposal. Therefore, the application is unacceptable for filing and will be dismissed. Please note that an adequate demonstration of no interference should contain items such as a map of the proposed interference area, a tower diagram, a satellite or aerial photograph, the antenna manufacture's vertical radiation pattern, and/or any details about any nearby structures or major roadways.

Accordingly, in light of the above, application BPFT-20160728AHP is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283

Sincerely,

James D. Bradshaw  
Deputy Chief  
Audio Division  
Media Bureau
