Preclusion Showing
Big Bear City, California

Advance Ministries, Inc. d/b/a New Life Christian School has provided supporting exhibits for the auction 83 long form application for Big Bear City, CA, Facility ID 142098. The instant application proposes minor changes from the original short form tech box proposal while maintaining the original antenna location. The closest market to the proposed transmitter site is Arbitron Market #26 Riverside-San Bernardino, CA. As seen on Figure 1 of this exhibit the specified antenna location is located within the 39 kilometer buffer. While The FCC LPFM Grid Tool shows no LPFM points available for the proposed channel 243 within the 30 x 30 grid. However there are Grid Points available for channel 245 (96.9 MHz), 2nd adjacent to the proposed translator. When adding in the required 2nd adjacent distance protection of 14 kilometers, there is no overlap to the predicted Grid. Thus, The Big Bear City, CA application satisfies the Grid Preclusion Showing by not precluding any identified points.
