

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. (“CCBL”), a licensee of Clear Channel Communications, Inc. (“Clear Channel”). CCBL proposes the acquisition of KTFA(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Call Sign	City of License	Facilities
KTFA(FM)	Groves, TX	Channel 223C2, 50 kW, 134 m
KYKR(FM) ¹	Beaumont, TX	Channel 236C, 100 kW, 131 m
KIOC(FM)	Orange, TX	Channel 291C, 100 kW, 323 m
KKMY(FM)	Orange, TX	Channel 283C1, 100 kW, 123 m
KTRH(AM)	Houston, TX	740 kHz, 50 kW, U, DA2
KLVI(AM)	Beaumont, TX	560 kHz, 5 kW, U, DAN

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.²

Clear Channel currently does not have or propose to have an attributable interest in any other station with a principal community coverage contour that overlaps or intersects the station proposed to be acquired.

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of KTFA(FM), KYKR(FM), KIOC(FM), KKMY(FM), KTRH(AM) and KLVI(AM) are shown in Figure 1 herein. There is one “radio market” for analysis under the Commission’s Rules.

Market 1 is defined by the principal community contours of KTFA(FM), KYKR(FM), KIOC(FM), KKMY(FM), KTRH(AM) and KLVI(AM).

¹ There is a pending application (BPH990225IF) for KYKR(FM) to change the station class, transmitter location and antenna height.

² See Section 73.3555 of the FCC Rules.

Count of Stations in Defined Markets

The number of radio stations in the "radio market" is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Market 1, there are 86 radio stations (43 AM and 43 FM), including the subject co-owned stations, that intersect or overlap the "radio market."

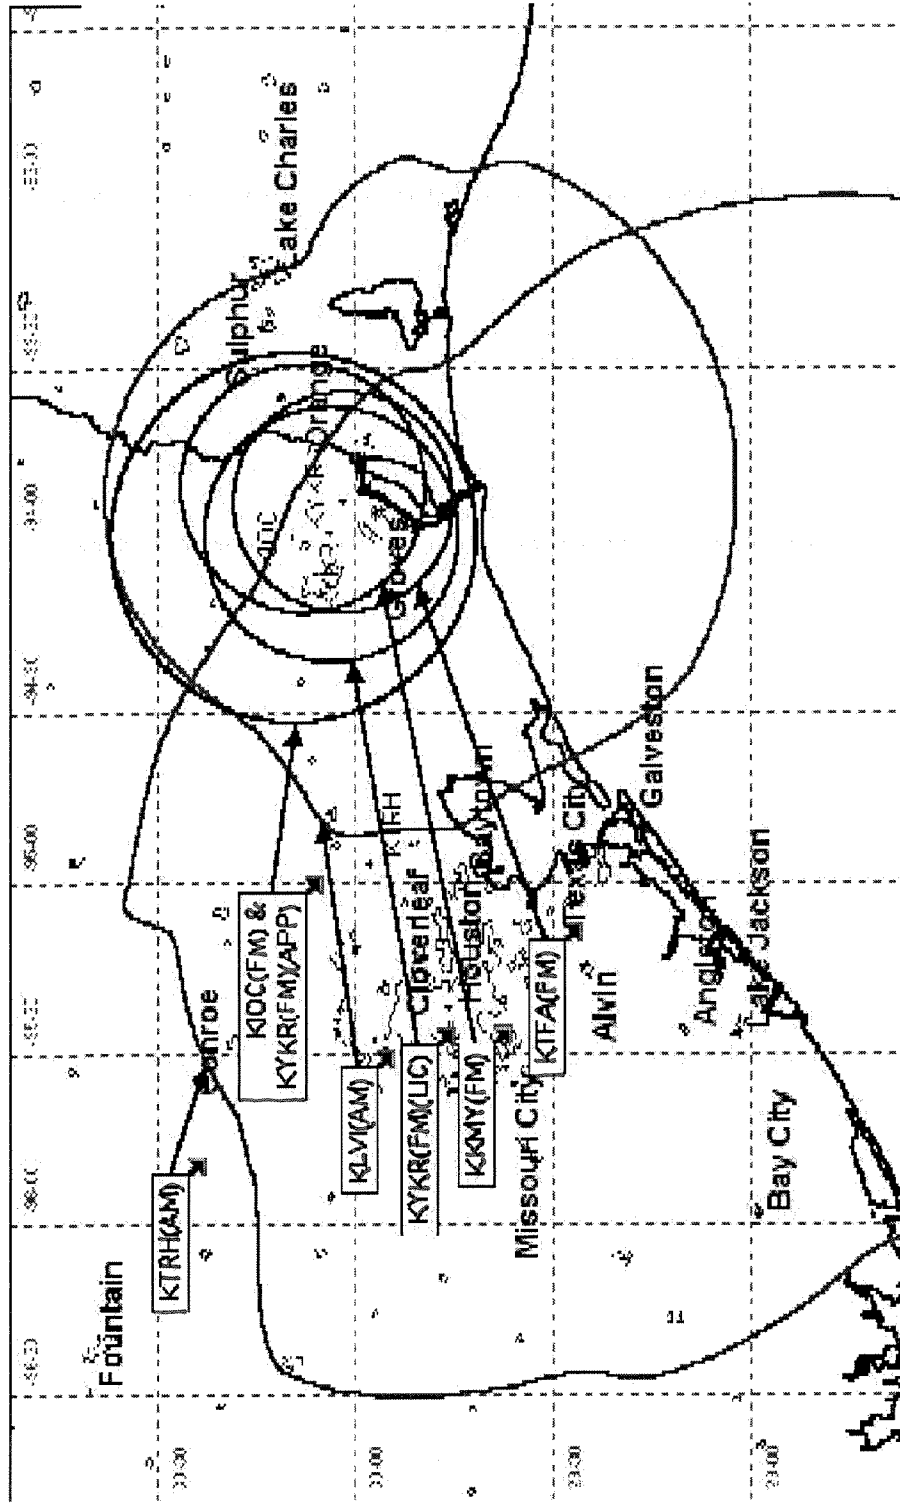

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
