STATEMENT FROM SUPERVISING ENGINEER

From June 27, 2011 to June 30, 2011, I personally supervised the crew from Ionos Communications, Inc., during the assembly and erection of the Shively 6810-5-SS-DA antenna for radio station KYRK, Taft, Texas.

I hereby certify that all assembly and mounting instructions and drawings provided by the manufacturer were followed and that the antenna was assembled and erected on the tower as per those drawings and instructions.

I have supervised the assembly and installation of over 80 broadcast antennas throughout the south and southwest and am intimately familiar with the rules of the Commission regarding directional antennas for the FM radio service.

A handwritten signature in black ink, appearing to read "Richard Elizondo", is written over a horizontal line. The signature is fluid and cursive.

Richard Elizondo, Senior Consultant
Ionos Communications,
Corpus Christi, Texas
