

**73.525 Compliance**

There are several considerations outlined in 47 C.F.R. 73.525 for TV channel 6 protection. Outlined below are the various factors as they apply to the proposed operation and KRMA-TV license and CP.

- 1. Distance between proposed operation and the affected channel 6**  
47 C.F.R. 73.525(a)(1) requires a minimum separation of 265 kilometers for a channel 201 operation. The distance between the proposed station and KRMA-TV(LIC) is 165.41 kilometers. The distance between the proposed station and KRMA-TV(CP) is 170.73 kilometers.
- 2. Population Limitation**  
When a proposed non-commercial station is not co-located with the channel 6 station in question, the applicant is required to show that the interference area (as predicted by the procedures outlined in 47 C.F.R. 73.525(e)(1)) contains no more than 3,000 persons.
- 3. Vertically Polarized Transmissions**  
When an applicant wishes to use vertically polarized transmissions only, C.F.R. 74.525(e)(4) limits the vertical ERP to the maximum permissible horizontally polarized ERP multiplied by 40 (if the predicted interference area lies entirely outside the limits of a city of 50,000 persons) or 10 (if not). The maximum permissible horizontally polarized ERP for the proposed facility is 1.175 kilowatts. Since any predicted interference area lies entirely outside the limits of a city of 50,000 persons, that is multiplied by 40 to obtain the vertical-only ERP of 47.0 kilowatts specified in this application.

The interfering contour of the proposed operation does not cross the Grade B contour of KRMA-TV(LIC) or KRMA(CP) (see Exhibit 19-A), therefore there is no interference area.

For the reasons outlined above, the proposed operation fully complies with the provisions of 47 C.F.R. 73.525.
