

### **Proposed Use of Translator**

In a recently filed FCC Form 349 application to modify the construction permit for K269FA (FCC File No: BMPFT-20070702DJV), Applicant sought to modify the proposed use of the FM translator from a fill-in translator for Applicant's own FM station KZLA to a translator rebroadcasting the signal of another FM station in which Applicant has no interest. By this amendment, Applicant is returning to the originally proposed use of the translator, namely to operate as a fill-in translator for Applicant's own FM Station KZLA in Huron, CA. Accordingly, this amendment changes the proposed primary station back to KZLA and reduces the proposed ERP to keep the K269FA contour within the KZLA contour.
