

KAGM KTRR Interference Map

Map showing the coverage areas for KAGM and KTRR stations. The map displays two main coverage regions: one centered around Ft. Collins and another centered around Denver. Both regions show concentric circles representing different field strength levels: $< 54 \text{ dBu F}[50,10]$ (outer circle) and $< 60 \text{ dBu F}[50,50]$ (inner circle). The map includes numerous city names, major highways, and geographical features. A legend in the bottom right corner provides technical details: Mag 9.00, Tue Jun 11 11:42 200, Scale 1:1,000,000 (at 20 Miles), and a 20 km scale bar.
