

JULES COHEN, P.E.
CONSULTING ENGINEER

Exhibit Eng 12

**ENGINEERING STATEMENT ON BEHALF OF
NEW YORK TIMES MANAGEMENT SERVICES
TOWER AT GAGE, OKLAHOMA**

Environmental Considerations

This engineering statement was prepared on behalf of New York Times Management Services ("NY Times"). NY Times is applying for a companion channel construction permit for KFOR-DT, Oklahoma City, Oklahoma, translator K18BV. The antenna for the digital translator is to be located on the existing 80.2-meter tower at Gage, Oklahoma (ASRN 1036309).

A study has been made of the RF exposure to be found in the vicinity of the tower from the proposed addition. The study calculation was made as prescribed in OET Bulletin 65. The percentage of exposure, at two meters above ground, relative to the maximum permitted for the general population, is 0.117.
