

Exhibit 11
Radio Assist Ministry, Inc.
Adjacent Channel Interference
Ocilla, Georgia

The Proposed translator on FM Channel 251D with facilities of 13 watts ERP at a maximum 117 meters AAT is within the 60 dBu protected contour of station WKAA (Ocilla, GA.) on 2nd lower adjacent channel 249. The F(50,50) contour with respect to WKAA at the proposed translator site is 75 dBu. Utilizing the undesired to desired method of calculating interference, the proposed interfering contour with respect to WKAA is 115 dBu. The interfering contour (calculated by the free space equation in the worst case radial) will extend a maximum of 45 meters from the proposed antenna.

In addition, the proposed translator is within the protected contour of WLPF (Ocilla,GA.) on the 2nd upper adjacent channel 253. The F(50,50) contour with respect to WLPF is 74 dBu at the proposed site. The maximum interfering contour of 114 dBu will extend to a maximum of 50 meters from the proposed antenna.

The antenna of the proposed translator is 98 meters above ground. The interfering contour extending to a maximum of 50 meters is above ground.

Inasmuch as no population inhabits this area, Radio Assist Ministry respectfully requests a waiver of contour overlap regulations with respect to the proposed translator.
