

February 28, 2019

Dear,

Federal Communication Commission,
445 12th Street, SW
Washington, DC 20554

MR Rafael Fernandez had been our engineer for more than fifteen years. I believe that MR Fernandez is without doubt the appropriated person for taking over this frequency. He is and he will continue being our engineer for our others frequencies KDHW-CD (channel 35) and K39DM (channel 27). There is not sale involved on this transaction simply MR Fernandez has been the engineer who is been the one involved on our operation way before of the transition from analog to digital. The commission will find that MR Fernandez had also been our representative on all of our records and FCC filings.

Following the Federal Communication Commission Rules. MR Rafael Fernandez will continue operating K19JX-D and the proper account will be created in the Licensing and management System following the Commission rules. The exhibit of this application is been placed in the station records.

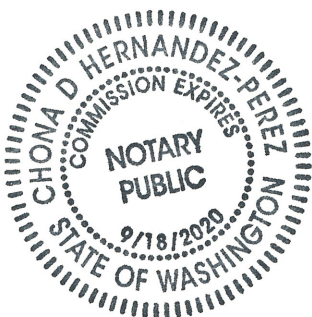

It is clear that between MR Jere Irwin and MR Rafael Fernandez that once the FCC approves the transfer, MR Rafael Fernandez will continue operating and following all of the commission's rules. With the understanding that this is a final agreement, voluntarily we both sign below.

MR Jere Irwin

Jere Irwin Date 3-1-19

MR Rafael Fernandez

Rafael Fernandez Date 3-1-19

Chona D. Hernandez-Perez
