

**APPLICATION FOR STATION LICENSE**  
**SOUTHERN COMMUNICATIONS CORPORATION**  
**W266AZ FM TRANSLATOR STATION**  
**CH 266D - 101.1 MHZ - 0.250 KW**  
**BECKLEY, WEST VIRGINIA**  
**June 2010**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Southern Communications Corporation ("SCC"), licensee of FM translator station W266AZ, Channel 266D, Beckley, West Virginia. SCC has a construction permit (BPFT-20090605ABL) to make minor changes to FM translator W266AZ. SCC herein submits a license application to cover the outstanding permit. Attached as Exhibit A is a calculation of the transmitter power output for FM translator W266AZ.

It is noted that the station to be re-transmitted by W266AZ has been changed to AM station WWNR, 620 kHz, Beckley, West Virginia. As indicated on the attached Exhibit B, the 60 dBu contour of the W266AZ facility is wholly encompassed within the predicted 2.0 mV/m contour of WWNR.<sup>1</sup> WWNR is co-owned with W266AZ.

There are two special operating conditions/restrictions listed on the W266AZ permit. The first condition states that an application for station license, FCC Form 350, must be on file prior to commencing program tests with the facilities authorized in the permit. The submission of this instant application satisfies the condition.

---

1) The 60 dBu is also encompassed within the 25 mile radius from the WWNR site.

The second condition states that SCC will reduce the power of W266AZ or cease operation to insure persons with access to the site are not exposed to radio frequency radiation levels above the limits. SCC states that it will, in cooperation with other tower users, reduce the power of W266AZ or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines. Based on the foregoing, it is believed all conditions on the W266AZ construction permit have been satisfied.
