In re: K201BY, Delta, Etc., UT  
BPFT-20110603ABT  
Facility ID # 69344

Dear Applicant:

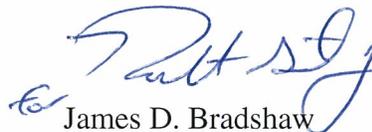

This refers to the above-captioned application for a FM translator K201BY, Delta, Etc., Utah.

An engineering study of the application reveals that it is in violation of 47 C.F.R. § 74.1235 (b)(2) since the 60 dBu service contour of the proposed translator is not within the 60 dBu protected contour of primary station KUER-FM, Salt Lake City, Utah.

In addition, the application proposes an effective radiated power ("ERP") of 50 watts. Section 74.1235(b)(2) states that the maximum allowable effective radiated power with an antenna height above average terrain (HAAT) between 236 meters and 260 meters is 41 watts. Our study reveals that the azimuth at 0° has a HAAT of 249 meters. The application failed to discuss this violation. Therefore, we will dismiss the application.

In light of the above, Application BPFT-20110603ABT is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw  
Associate Chief  
Audio Division
