

TECHNICAL STATEMENT  
RADIO MULTIPLE OWNERSHIP ANALYSIS  
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. (“CCBL”), a licensee subsidiary of Clear Channel Communications Inc. (Clear Channel). CCBL proposes to acquire the facilities of KLTC-FM (FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	State	City	Freq	ERP_w	Class
KBAZ(FM)	MT	Hamilton	98.3	85000	C
KYSS-FM	MT	Missoula	94.9	61000	C
KLTC-FM	MT	Superior	107.5	100000	C1
KGVO	MT	Missoula	1290	5000	B
KLCY	MT	East Missoula	930	5000	B

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission’s multiple ownership rules<sup>1</sup>.

Clear Channel does not have an attributable interest in any other station with a principal community contour that overlaps or intersects with the principal contour of KLTC-FM.

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. The predicted principal community contours of all the stations studied herein (as tabulated in *Table 1* above), are shown in *Figure 1*. These mutually overlapping contours form one “radio market” for analysis under the Commission’s rules.

---

<sup>1</sup> See 47 C.F.R. Section 73.3555.

Radio Market is defined by the mutually overlapping principal community contours of KBAZ (FM), KYSS (FM), KLTC-FM, KGVO (AM) and KLCY (AM).<sup>2</sup>

#### Count of Stations in Defined Markets

The number of radio stations in a “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or controlled stations.

In “radio market 1” studied herein, there are at least 10 radio stations, including the subject co-owned stations, which overlap or intersect with the defined “radio market.”

*Figure 2* is the tabulation of some of the radio stations identified in the “radio market”.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. Section 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. Section 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposal complies with Section 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham  
FCC Engineering Specialist  
Clear Channel Broadcast Licenses, Inc.

---

<sup>2</sup> A Clear Channel subsidiary is also the licensee of KLYQ(AM) Hamilton MT., the principal community contour of KLYQ(AM) does not intersect with that of KLTC-FM, it’s contour is included for informational purposes only
