

LETTER OF ASSENT

KOBH has a translator Channel 47 at 1907th, California, (K47DNV). Better Life Television is developing a Channel K47KH at Mt Blue SE of Grants Pass, a distance of 55 miles. Profiles indicate many mountains between the two sites. One mountain is upwards to 6000 feet.

In the unlikely event interference should occur in the K47DNV coverage area, Better Life Television agrees to modify its antenna or lower the output power so that the problem is eliminated.

Because of the above conditions KOBH agrees that Better Life Television can use a Scala SL8 Antenna with 3 degrees of down tilt running an effective radiated power of 3.7 kW.
