In evaluating the proposed conversion to digital for WJNK-LP, FID 30257, an outgoing interference study was executed. It was discovered that according to Longly-Rice methods approved by the OET, that WBKO-DT FID 4692 would receive lethal interference if WJNK-LP were to continue operation on channel 34. After thorough searching, channel 28(T) was found to cause no lethal levels of interference to other stations. Thus, Three Angels Broadcasting Network respectfully requests that the Commission look favorably on this application.
