

Earl H. Tolley declares that:

1. Implementation of KNUI-FM required no changes to the existing master antenna.
2. R.F. exposure measurements have been made utilizing a Holaday HI-4416 meter with E and H field probes. No spots were found that exceeded the "controlled" limits.
3. Spurious measurements have been taken utilizing a Tektronix 7L14 Spectrum Analyzer finding that the total system is in compliance.
4. That the foregoing statements regarding technical work, are true and correct of his own knowledge

Earl H. Tolley
Chief Engineer,
Pacific Radio Group

APPENDIX A - LOCAL ENGINEER CERTIFICATION

KNUI-FM - Ch. 260C - 72 kW - Kahului, HI
