### Section III – Engineering Technical Specifications Certification

	Construction Permit Antennas	<b>As Built Antenna</b>
6. Constructed Facility	SWR SWLP12OI	<b>SWR SWLP16OI</b>

The original construction permit specified an SWR SWLP12OI directional antenna. The facility was constructed using a SWR SWLP16OI antenna. The antenna used is identical in pattern to the antenna specified in the construction permit. The antenna used is only different in that it has four additional bays so as to allow the facility to broadcast at the effective radiated power specified in the permit. In all other regards, the facility is constructed as specified in the construction permit.
