

MINOR CHANGE APPLICATION
6 JOHNSON ROAD LICENSES, INC.
NEW FM TRANSLATOR STATION
CH 232D - 94.3 MHZ - 0.001 KW
PEEKSKILL, NEW YORK
April 2018

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of 6 Johnson Road Licenses, Inc. ("6JRL"), an applicant for a new FM translator station on Channel 232D at Peekskill, New York (FAC ID 202878). 6JRL is herein submitting the long form construction permit application for the "Tech Box" application (BNPFT-20180130AGX) for this facility, pursuant to Public Notice DA 18-256, released March 15, 2018.

The proposed new FM translator antenna is to be located on an existing structure which has been registered with the FCC and assigned Antenna Structure Registration Number 1006358. Since no changes are proposed for the tower structure, the FAA was not notified of this proposal.

6JRL proposes to rebroadcast the signal of AM station WLNA, 1420 kHz, Peekskill, New York on the proposed new facility. The proposed new translator's 60 dBu contour is within 25.0 miles (40.0 kilometers) of the WLNA site; therefore, the new translator is considered a fill-in translator. Exhibit A is a map demonstrating compliance with the fill-in requirements.

Exhibit B is a study demonstrating that the proposed new translator will not cause interference to any full service station, nor will interference be delivered to or received from any existing FM translator or LPFM application.

Due to the co-location of the proposed new translator's antenna with other FM stations, the worksheets associated with FCC Form 349 could not be used to demonstrate compliance with the Commission's human exposure guidelines for radio frequency radiation. Exhibit C documents compliance with the radio frequency radiation guidelines.

All other necessary documentation used to certify the technical portion of FCC Form 349 has been forwarded to 6JRL and is available to the Commission upon request.¹

1) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All data regarding broadcast facilities was extracted from the Commission's CDBS database on the date of this application. We assume no liability for errors or omissions in that database which may be adverse to the request contained herein.
