Re: Townsquare License, LLC  
WNBF(AM), Binghamton, NY  
Fac. ID No.: 72372  
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed February 23, 2022, on behalf of Townsquare License, LLC ("Townsquare"). Townsquare requests special temporary authority ("STA") to operate station WNBF(AM) during daytime hours with reduced power and during nighttime hours with temporary emergency antenna facilities.<sup>1</sup>

In support of the request, Townsquare states that due to significant damage to the antenna system cables and an above ground cable support bridge at the transmitter site, the station has been operating with reduced power since February 18, 2022. Specifically the station is operating at 80% of licensed power during daytime hours and non-directionally at 25% of licensed power at night. Thus, the station requests STA to continue operating with a reduced daytime 7.4 kilowatts and non-directionally at night with a reduced power of 1.25 kilowatts.

Section 73.1560(d), which governs reduced power operation, states:

In the event it becomes technically impossible to operate at authorized power, a broadcast station may operate at reduced power for a period of not more than 30 days without specific authority from the FCC. If operation at reduced power will exceed 10 consecutive days, notification must be made to the FCC in Washington, DC, Attention: Audio Division (radio) or Video Division (television), Media Bureau, not later than the 10<sup>th</sup> day of the lower power operation. In the event that normal power is restored within the 30 day period, the licensee must notify the FCC of the date that normal operation was restored. If causes beyond the control of the licensee prevent restoration of the authorized power within 30 days, a request for Special Temporary Authority (see Section 73.1635) must be made to the FCC in Washington, DC for additional time as may be necessary.

Section 73.1680 of the Commission's rules provide for operation with emergency antenna facilities, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(1) states that AM stations may use a horizontal or vertical wire or a nondirectional vertical element of a directional antenna as an emergency antenna. AM stations using an emergency nondirectional antenna or a horizontal or vertical wire pursuant to this section, in lieu of authorized directional facilities,

---

<sup>1</sup> WNBF(AM) is licensed for operation on 1290 kHz with a daytime power of 9.3 kilowatts and a nighttime power of 5 kilowatts, employing a directional antenna pattern during nighttime hours (DAN-U).

shall operate with power reduced to 25% or less of the nominal licensed power, or, a higher power, not exceeding licensed power, while insuring that the radiated field strength does not exceed that authorized in any given azimuth for the corresponding hours of directional operation.

Our review indicates that the request complies with Sections 73.1560(d) and 73.1680.

Accordingly, the request for STA IS HEREBY GRANTED AND BSTA-20211129AAF IS SUPERSEDED. Station WNB(AM) may operate daytime and nighttime from its daytime tower with a reduced daytime power of 7.4 kilowatts and a reduced nighttime power not to exceed 1.25 kilowatts. It will be necessary to further reduce or cease operation if complaints of interference are received. Townsquare must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 23, 2022**.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or

- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in black ink that reads "Jerome J. Manarchuck". The signature is written in a cursive style with a large, stylized initial "J" and a long, sweeping tail.
