

## EXHIBIT 12

Item 6 requires the applicant to set forth all parties to this application and their attributable ownership interests. This application requests Commission approval only for a restructuring related to certain subsidiaries of Radio One, Inc. ("ROI"), the party that ultimately controls the current and proposed licensee entities. This application does not request approval for any change in the ownership of ROI itself. Other than the new wholly owned or controlled entities identified in Exhibit 10, this application does not introduce any new parties at the ultimate parent level or any subsidiary level.

Since this application does not request approval for any change in the ownership of ROI, the ownership of which has been passed upon repeatedly in Commission long-form applications, including applications for each of the stations listed in this application, no further information is necessary in response to Item 6.
