

Request for Extension of Special Temporary Authorization

Radio License Holding SRC LLC (“RLH”), pursuant to Section 73.1635 of the FCC’s rules, hereby requests that the initial special temporary authorization (“STA”) for radio station KTCK(AM), Dallas, Texas (Facility ID 8773) (File No. BSTA-20131106AJR, as extended, *inter alia*, by File No. BESTA-20181015ABD), be extended for an additional 180 days or until the Commission’s staff has an opportunity to act on the station’s pending license application (File No. BMML-20190329ACF).

Station KTCK is licensed to operate on 1310 kHz with 25 kW daytime and 5 kW nighttime, employing different directional antenna patterns during the daytime and nighttime hours. RLH previously informed the Commission that it made a substantial change in its plans for returning KTCK to licensed operation. Specifically, on July 7, 2016, KLIF Lico, LLC (f/k/a KLIF Lico, Inc.), an affiliate of RLH and the licensee of station KLIF(AM), Dallas, Texas (Facility ID 35061) (“KLIF”), filed an application to make minor changes in the licensed facilities of KLIF (File No. BP-20160707AAZ). That application requested Commission approval to relocate the KLIF transmitter to the KTCK transmitter site, and was granted on August 31, 2017. Upon relocating KLIF to the KTCK site, KLIF will utilize two of the towers in KTCK’s four-tower array.

The installation of the diplexed operation of the two facilities has been completed. *See* File Nos. BMML-20190329ACF; BMML-20190403ADF. However, as was explained in RLH’s most recent STA extension request, filed October 15, 2018, there were several physical changes in KTCK’s feed system that were required. Therefore, until the Commission’s staff has an opportunity to grant the station’s pending license application (File No. BMML-20190329ACF), RLH requests continued authority to operate with parameters at variance with the condition that KTCK will reduce power or cease operation if complaints of interference are received.

For the reasons stated herein, RLH respectfully requests a further extension of the existing STA for a period of 180 days to permit KTCK to continue to operate with parameters at variance. The requested extension will serve the public interest because it will enable KTCK to continue to serve the residents of Dallas and the surrounding area until the Commission’s staff has an opportunity to act on the station’s pending license application.
